NOTE: Print Page 1 first, then follow your printer's instructions for two-sided printing. The orange art should be back to back when printed correctly.

1 Cut out the square along the solid line. With the yellow panel on top, fold up from the center line. Crease well and unfold. Then, fold the left side of the paper to match up with the right side of the paper. Crease well and unfold. Your square should have a large X shape in the middle. Next, fold the two opposing corners to the center of the paper.
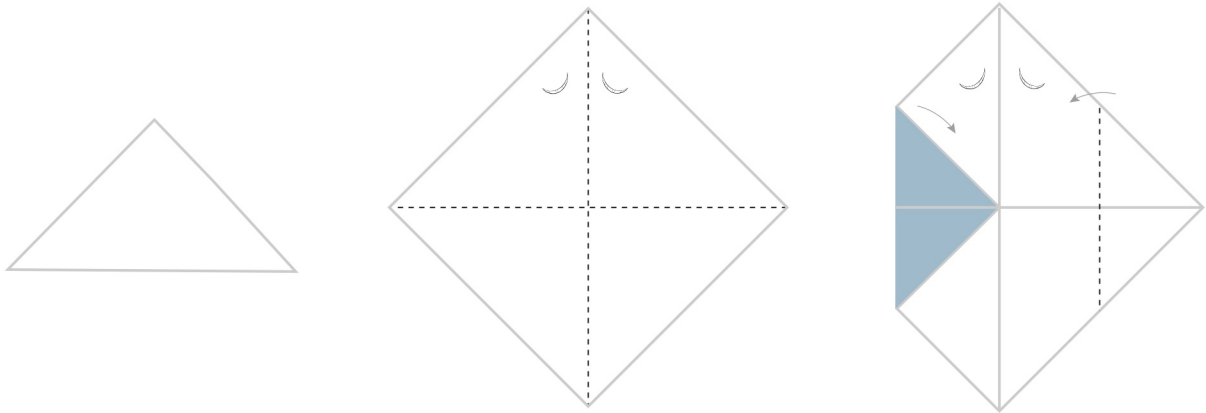

2 Flip the paper over. Fold the top corners so that each edge is lined up with the center vertical line. Crease well. Rotate the paper and fold the other set of corners the same way.
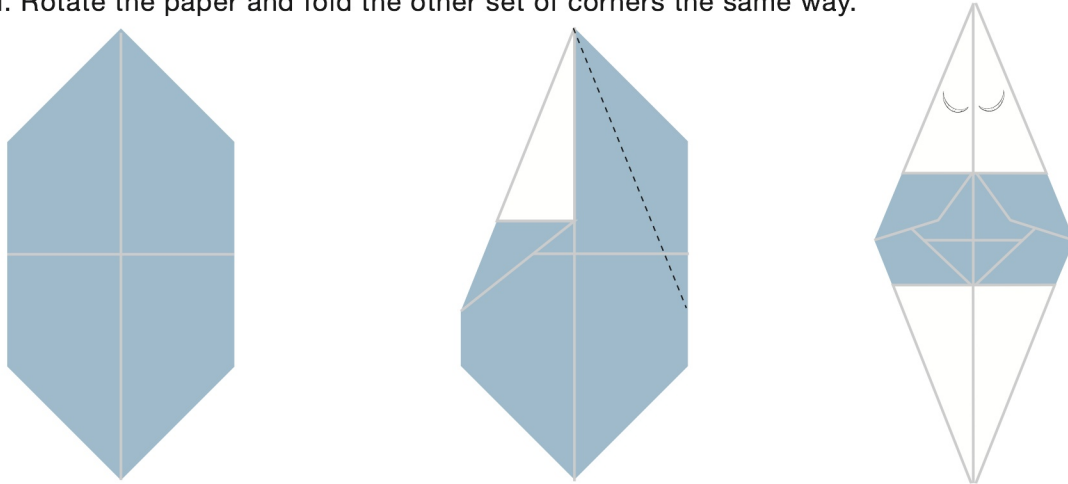

3 Fold the paper in half on the center line with the points facing down. Crease well.
